WHY THIS PROJECT?

The EU is going through a **political crisis**: it lacks innovation, modern solutions and a solid plan for the future. It has been losing significant support from the population.

We do not believe that it has to be dissolved but **profoundly innovated**, by students and young citizens who represent the future of the EU.

IN

- **Fundamental values** (UDHR 1948 – European Charter 2000).
- The blog **does not** have any **political affiliation**. Analyses and reports will be based upon reliable sources. Different perspectives will be adopted in order to give the broader picture.
